Mobility starts in the head. Mobile communication is nowadays a natural part of our private and job-related life. We look to be the first in innovative products and services so our customers don't stand still.

The Data Network Engineering team has recently been formed to align the product selection, testing and approval of hardware and software across T-Mobile. It is also responsible for producing and maintaining network architecture and best practices documents and managing the technical relationship between T-Mobile and hardware/software vendors.

We develop the mobile network and realize the design of the network construction regionally.

Are you ready to be successful with us?

Your tasks

- Product Selection – Support the selection of core

Job-related information:
